Their Majesties, Our King and Queen - God Bless Them

Proclaimed King throughout The Empire, Saturday, December 12th, 1936

George VI Succeeds His Brother Edward VIII

With due Splendour and Ceremony, His Majesty King George VI was duly proclaimed King of Great Britain, Ireland, and British Dominions beyond the seas, Defender of the Faith, and Emperor of India, at London, on Saturday, December 12, 1936.

We, British People, are now anchored in allegiance to the second son of the late revered George V and his Scottish Queen, who now grace the throne.

Proclamations of the accession of His Majesty were read at Charing Cross, Temple Bar, Royal Exchange and St. James Palace, London, and in all capitals of the Empire.

To our new King and his consort we offer our loyalty, and the heartfelt wish that God will bless them both, and give them the necessary strength to carry the burden laid upon them.

"GOD SAVE THE KING"

"And thy choicest gifts in store
On him be pleased to pour,
Long may he reign,
May he defend our laws,
And ever give us cause
To sing with heart and voice,
'GOD SAVE OUR KING!'"

How's This For Speed

A London Midland and Scottish Railway train, weighing 525 tons, and hauled by the 4-6-2 locomotive Princess Elizabeth on Monday, November 16th, 1936, accomplished the 40 1/4 miles from Euston Station, London, to Central Station, Glasgow, in 5 hours 53 minutes.

The journey gave the L.M.S. a number of world railway speed records. It was the longest, non-stop journey, with a steam engine, ever performed. The average speed was 68.2 miles per hour for the entire journey.

This run sliced over 1 1/4 hours off the ordinary train time from London (Euston) to Glasgow, which is 7 hours 35 minutes.

A feature of the performance was, the engine and coaches were exactly the same as used by the company on their ordinary express service.

Train No. 703 made the return journey to London on Tuesday, November 17, in 5 hours 44 minutes.

Crossfield to Have Amateur Nite Broadcast over CJCJ

Arrangements are being completed to hold an Amateur night in Crossfield on Wednesday, January 6, in the U.F.A. Hall. This will differ from the previous amateur nights already held, in so far that this time, it will be broadcast over radio station CJCJ.

As we go to press, we are unable to give you in full detail, the names of the local merchants who are backing and sponsoring this Broadcast Programme, but hope to be able to do so in our next issue. Meantime, keep your eyes open for the advance bills which will give full information, also these columns.

Our understanding is this, that the programme will be broadcast over CJCJ, and is made possible through the enterprise of several of the local merchants, and when their names are given out, those intending to enter, must procure from any of those merchants, the necessary entry blanks. January 6, CJCJ will send up to Crossfield, the necessary radio equipment and announcers, and from the entrants one winner will be picked, and he or she will represent Crossfield in the finals at Calgary, on some later date. The local winner will have all expenses paid for three days (meals, transportation and hotel) and will compete in the semi-finals first, then if successful, will enter the finals. Cash prizes go to the three ultimate winners, and several other valuable prizes will be given.

Other towns will be having similar broadcasts, and the winners from each make up the finalists. If you intend to enter, better get practising up your entry, as competition will be very keen.

Watch for fuller and further particulars next week.

Local Farmer Slugged and Robbed

Reports late last night (Wednesday) said R.C.M.P. at Crossfield were investigating an assault on E. Ainscough in the district at 8 p.m. It was reported he had been robbed of about \$20 after being hit over the head on a road near his home, nine miles southeast of here. Dr. Williams pronounced the injury was not serious.

Miscellaneous Shower

The home of Mr. and Mrs. J. P. Metheral, Monday evening, was the scene of a very happy gathering honouring the bride-to-be. Little Miss Phyllis Scholesfield presented to Miss Edith McKenzie a tastefully decorated wagon, chock full of miscellaneous gifts.

Misses Edna Ableman and Marian Longmire favoured the company with vocal solos.

A dainty lunch was served around midnight.

H. M. Queen Elizabeth

Coronation Ceremonies will be held in London during May 1937

Christmas Gifts For All

Pyrex Pie Plates, each	69c to 75c

Wheat Consumption In Canada

The announcement at the opening session of the Turgeon Grain Inquiry Commission by James McAnish, statistician of the Canadian Wheat Board, to the effect that the annual per capita consumption of wheat in Canada has declined more than a half a bushel in the past six years must have occasioned considerable surprise.

More than surprising, it is a startling revelation contained in the figures supporting his contention that a fairly steady annual consumption of 4.5 bushels per head of population for a period of years prior to and including 1929 had dropped to 3.9 bushels by 1935.

No reason was assigned by Mr. McAnish for this reduced support for one of the principal home industries of this country, so far as news reports of the proceedings indicate, but, when it is remembered that this reduced consumption in the producing country is augmented by diminishing consumption of Canada wheat in importing countries it is a matter of concern which appears to require further investigation.

A reduced consumption of wheat at home might not be a matter of such grave concern to Canadian farmers if it were not for restriction in the import market and if it was due to an increased consumption in Canada of other Western Canadian farm products but, so far no evidence has been adduced to show that this is the case.

Until some further evidence to show the cause of this decline in home consumption, if available, is produced, the subject is one likely to arouse considerable speculation.

In a recent editorial the Saskatoon Star-Phoenix sought to show, by reference to a series of index figures concerning the sales of a number of commodities, that the blame should not be laid at the door of the Western Canadian consumer, leaving the inference that the reduction of the use of cereal products on the meal tables of Canadians must be attributed to change in the diet habits of the people of Eastern Canada.

This appears to be a reasonable inference in the light of the fact that wheat products in the form of bread constitute the cheapest food commodity available in this country and the further fact that conditions in the agricultural west in the last few years have not warranted the substitution of more expensive food for the humble loaf.

If improved economic conditions are responsible for reduced consumption of wheat products in Canada it is only the fact that can qualify for this distinction. Certainly conditions in the west up to and including 1935 have not warranted any upward change in the general dietary of the people.

Experience of recent years has shown that as economic conditions improve in countries with a relatively high standard of living there is a tendency to cut down consumption of cereal products in favor of an increased use of meats, fruits and dairy products. This has happened in the past two or three years in Great Britain and particularly in Scotland, accounting for a narrowing market for Canadian wheat in the Motherland.

Informative light on the dietetic trends of countries of the world was shed by Professor J. S. Davis of the University of Stanford Research Institute at the World's Grain Show in Regina when he quoted carefully compiled and analyzed statistics to show that in countries with a high standard of living such as the United States there was a progressively marked tendency towards reduced consumption of cereals. Dividing the countries of the world into three groups he proved that there is a reverse tendency in countries with a low standard of living, such as China and India while consumption in the intermediate group in which he included a number of mid-European countries remains more or less static.

The combined information confirms statements made some time ago in this column, namely that the solution of the problem of the Canadian wheat producer lies in two directions, the opening up of new or comparatively new markets in countries where the living standard is still low and encouragement of increased consumption in existing markets in countries with a high standard of living, and particularly the latter for obvious reasons.

During the past couple of years the millers of Great Britain, alarmed at the steady decline of wheat consumption in their own country have been staging an "Eat more Bread" campaign, but apparently with comparatively little effect. This is not very surprising because, if people want higher priced commodities and are able to pay for them, they will buy them regardless of such campaigns.

The only way that such campaigns can be effective is to back them up by making bread and other wheat products more attractive. This is being done to a limited extent by bakeries in some of the urban centres of Western Canada by the use of "sesame seeds" and other "seasonings" which not only make bread more attractive in appearance but more appealing to the palate and what is more the bakers get a higher price for such products than the standard loaf.

If consumers in Western Canadian cities are prepared to pay more for "fancy" breads, the probability is that such methods would bring increased consumption if properly launched and pushed with vigor in the United Kingdom and Eastern Canada and this is a field which might be well worth exploring.

In countries where the standard of living is high and rising the solution for the wheat producer lies not in cheapening the product but in making it more attractive.

Would Settle Nothing

Another War Might Add Further To World's Troubles

According to League of Nations figures, there are three million more men under arms in the permanent forces of the world to-day than at the outbreak of the great war, which was to have ended war. The number of men in armies and navies to-day is set at 8,200,000 and does not include the semi-official forces in some lands. Many of our troubles may be traced directly to the great war, which settled nothing and seems to be leading to a new war which will settle nothing again except perhaps the fate of civilization.—Niagara Falls Review.

On Jan. 2, the sun is about 3,110,000 miles nearer the earth than at any other time.

Subject To Man's Will

Booms And Depressions Do Not Merely Come And Go

Business prophets usually talk as though good and bad times come and go with the inevitability of the tide. The doctrine of economic predestination must not be allowed to obscure us into a state of submission to fate. The universe may be mechanical, but the affairs of mankind are subject to the will of man. Neither depressions nor booms are inevitable if we make up our minds to avert or control them. Booms and depressions are made by man and anything that is man-made can be unmade or made differently by man.—Stratford Beacon-Herald.

Five hundred large factories in Egypt have been equipped with modern machinery.

Broadcast Reception

Highly Unsatisfactory Over Wide Areas Of Prairie Provinces

Highly unsatisfactory broadcast reception conditions over wide areas of the prairie provinces is the subject of a statement by the Canadian Broadcasting Corporation. The statement, issued by the corporation to western newspapers, says:

The Canadian Broadcasting Corporation desires that radio listeners in Western Canada should know that it is aware of the unsatisfactory broadcast reception conditions over wide areas of the prairie provinces, and that it is moving as rapidly as possible towards their correction.

The corporation's coverage survey has progressed far enough to show that western coverage is inadequate and that reception interference from outside Canada is aggravating the situation in blanketing stations to which listeners ordinarily look for Canadian broadcasting. The corporation realizes that this situation is causing great inconvenience to many thousands of western people.

The results of the coverage survey were nearly ready for examination by the board of governors.

Temporary measures of redress are being taken wherever possible but unfortunately the situation is such that expedients are unusually few. Permanent solution requires the application of a comprehensive plan.

View Of Famous Violinist

Fritz Kreisler Thinks Radio Broadcasting Has Cheapened Music

Fritz Kreisler said in San Francisco that radio has had a disastrous effect on music as a profession.

Notably shy before the microphone himself, the violinist asserted that "broadcasting mars what the artist produces, and what the public gets is not the artist's conception, but the radio operator's conception."

Those who pay for tickets to a concert and make an effort to attend a recital in a hall have made some sort of sacrifice, however small," he said. "Radio's constant inundation of music in the home tends to cheapen it."

"I did three apodes" is no proper accompaniment to a Toscanini broadcast."

The radio makes music too easily obtainable, the artist asserted.

Those who pay for tickets to a concert and make an effort to attend a recital in a hall have made some sort of sacrifice, however small," he said. "Radio's constant inundation of music in the home tends to cheapen it."

"I did three apodes" is no proper accompaniment to a Toscanini broadcast."

Valuable Stamp

Proposal For Collectors In United States To Unite To Purchase It

A faded little stamp of British Guiana, dated 1856 and generally labelled as the "world's most valuable," excited delegates to the American philatelic congress. A group of collectors made plans for keeping it in America permanently.

James Waldo Fawcett of Washington, secretary of the congress, said a proposal for the stamp collectors of the United States unite to buy the stamp, valued at \$40,000, would be presented to the congress.

The stamp was part of the estate of Arthur Hind, Ulica, N.Y., manufacturer, and now is in the possession of his widow, who has remarried.

Hind bought the stamp in 1923 at an auction in Paris for \$32,500. Fawcett said. Collectors said it's the only one of its kind ever found.

SELECTED RECIPES

WALNUT WAFFERS

4 tablespoons Purity Flour

4 tablespoons butter

1 1/2 cups brown sugar

1 egg

1 1/2 cups chopped nuts

2 tablespoons water

Method: 1. Mix in order given and drop from teaspoon on to greased baking sheet.

2. Bake in hot oven of 400 degrees for 7 to 10 minutes. Cool before removing from pan.

B.C. Rhodes Scholar

Kamloops Man Has Been Chosen Of Selection Committee

E. Davie Fulton of Kamloops, son of a former provincial cabinet minister, was selected British Columbia Rhodes scholar for 1936 by the selection committee. Davie graduated from University of British Columbia in 1935. He is the son of the late F. J. Fulton, K.C., attorney-general in the government of the late Sir Richard McBride in 1906.

It is possible for a healthy, well-fed man to die of starvation a short time after eating a hearty meal. Some "unbridled dictionaries" give one meaning of "starve" as to "die of cold."

One Thing World Needs

Longer Sermons And More People To Hear Them

To our mind says the Chatham, Ontario, News, the average churchgoer spends too much time worrying over the length of sermons. Most men who do go to church, are present in the Sanctuary once a week. That means that they spend all their waking hours of the week thinking about material things, and even when they do go to church they can spare only a few minutes of their time listening to the minister talk about spiritual things. They limit the speaker to 20 minutes—not a very long time when you consider how many minutes there are in a whole week.

As a matter of fact an hour should not be considered too long, under such circumstances—and when we look at conditions in the world today, one of the things we need apparently is not shorter sermons, but "more and longer" sermons—and more men to listen to them.

As a matter of fact an hour should not be considered too long, under such circumstances—and when we look at conditions in the world today, one of the things we need apparently is not shorter sermons, but "more and longer" sermons—and more men to listen to them.

Called On Old Friend

Queen Mary Paid Visit To Former Member Of Royal Household

On a recent afternoon a ring came to the door of No. 35, Ingleside, Ealing. When the servant opened the door, he saw two women standing on the step, one young, the other white-haired. He bowed to the elder. It was Queen Mary.

She drove to the house, an ordinary suburban two-story house, to visit an old friend, Lord Ormswath, who is 77 years of age and who was once a member of the Royal Household. For 13 years, from 1907 to 1920 he was Master of Ceremonies. But now Lord Ormswath is nearly blind. His wife, who was president of Queen Mary's Sewing Guild, died 15 years ago and he is confined to an invalid's chair.

To cheer him in his retirement, Queen Mary sends him a present of game from Sandringham every Christmas and the other day with Lady Forester, she brought her old friend a thick warm rug to wear in his garden. She found him in his invalid's chair.

"I'm afraid I can't get up, your Majesty," said Lord Ormswath. "Don't you move," replied Queen Mary. "Here let me wrap this rug around your knees."

She did. Then she sat down by his side, and for half an hour Queen Mary and her old friend talked of things that are past.

The Family Buys A Car

Father's Question: "How many miles to a gallon?"

Mother's Question: "What color is the upholstery?"

Son's Question: "How fast will she go?"

Daughter's Question: "Has it a good mirror?"

Neighbors' Question: "How can they afford it?"

John Drinkwater, dramatist, told an audience in London he would not be surprised if the cinema disappeared in 25 years with television upsetting the industry in the next five years.

The human body has a blood content of five quarts.

Pulse beats in the ocean cause a displacement of the waters of the Gulf Stream.

Pineapples are about 87 per cent. water.

Veterans' Hearing Ends

Commission Now Assembling And Studying A Mass Of Material

Having concluded their public hearing throughout Canada, the war veterans' assistance commission now is engaged in assembling and studying a mass of material. The inquiries of that body took it into all the large centres of population in Canada.

Colonel J. G. Rattray, chairman, in a statement issued at Ottawa, says that "through briefs received from veterans' associations and individuals, invaluable suggestions for the elimination of local and general unemployment among ex-service men were submitted. In each centre the commission made a study of the conditions confronting those unfortunate enough to be relief recipients."

In most of the places visited the commission established voluntary local committees of prominent business men, who have pledged themselves to assist the commission in the completion of its task.

Enumeration and classification of unemployed veterans has been delayed by reason of the fact that returns on the commission's questionnaire continue to be received.

Reading A Speech

Art Has Been Mastered By Very Few Orators

Few orators have mastered the art of reading a speech, as recent news films of the American Presidential campaign emphasize. Neither Mr. Roosevelt nor Governor Landon succeeds. Both take hasty glances at their audience, instead of imperceptible glances at their text.

Lord Howart's speech when he opened the Sunday Times Book Exhibition at Dorland Hall was a perfect example of how it should be done. His many quotations made a manuscript necessary. But it was only when he turned a page that he was conscious of the paper.—London Daily Mail.

Pulse beats in the ocean cause a displacement of the waters of the Gulf Stream.

Pineapples are about 87 per cent. water.

Save "LEFT-OVERS" with Appleford's Presto Pack Waxed Tissue

MORE CONVENIENT TO USE

Just hang a package in your kitchen. You'll be delighted with its convenience... for, with one hand, you can easily extract a single sheet at a time leaving the other hand free to hold the "left-over" being wrapped.

Warehouses at Calgary, Edmonton, Regina and Winnipeg

WELCOME FROM THE POPULACE TO THE NEW KING

London.—On every side there were indications a most sincere welcome from the populace of the United Kingdom is awaiting the Duke and Duchess of York as king and queen.

Naturally they are not so well known to the empire at large or even within these isles as King Edward VIII, but of their genuine good-will to all and anxiety to serve the community there has been abundant proof.

It is too early to say yet whether they will be able to undertake the empire tour already provisionally planned for King Edward. The duke has often expressed a desire to visit Canada, with which his acquaintance is very slight. In 1915, as a cadet in the royal navy, he visited Halifax. He also made a visit to Niagara Falls, Ont., passing through Toronto en route.

The duke does not enjoy such robust health as his elder brother, although his physical disabilities seem to have been largely overcome of recent years.

It is no conventional statement to say the Duchess of York—"the Little Duchess," as she is often called—has a charm almost peculiar to herself. It was recalled how at the launching of the Canadian Pacific liner "Royalty," her name and christened by her she walked along the shipway, nodding and smiling all the way to the somewhat dour crowds of Clydeside shipworkers.

The duke, too, has an easy way in public, particularly as he has now almost completely overcome a tendency to stammer which once was a serious handicap in making speeches.

He is not afraid, either, of making sly jokes about those around him. One of these, an allusion to the famous Irish nationalist, "Tommy O'Connor," in an after-dinner speech, was greeted with loud laughter.

"Mr. O'Connor," said the duke, "is devoted to Ireland. In fact, he will do anything for Ireland except live in it."

It was only last Dec. 2 that the Duke and Duchess paid a memorable visit to Edinburgh. The duchess received the freedom of the Scottish capital and the duke participated in high Masonic ceremonies.

As for their children, Princess Elizabeth and Princess Margaret Rose, their photographs hang in thousands of nurseries all over the empire.

With such a happy family circle established shortly at Buckingham palace, feeling was the throne would assume an even added lustre.

Airliner Crashes

Forty-seven Persons Meet Sudden Death At Croydon Airfield

Croydon, Eng.—Forty-seven persons, among them Juan de la Cierwa, the aviator inventor, met sudden death in the crash of a "K.L.M." (Dutch) airliner, just four minutes off the runway at Croydon airfield.

Three survived, with varying injuries. They were the German passenger Walter Schuber, the wireless operator, Von Bommel, and the stewardess, Frautien de Ge. The condition of the men was grave; that of the stewardess, who leaped from the craft before it caught fire, was not dangerous.

Trapped by twisted steel and flames, De la Cierwa died with the former Swedish secretary of state, Admiral Arvid Lindman, and 12 others, including two of the crew.

There were 17 passengers aboard the airliner. The "K.L.M." announced the other dead as:

Baron Gottfried Meyer-Hohenburg, of Germany, former husband of the Vienna actress, Lili Deste; Charles Robert Dickson, prominent Swedish banker, of Stockholm; Pearson, a Briton; Wegelin, a Finn; Van Arle, Dutch; Donkelaar, Dutch; Dr. Kurt Hoene and Mrs. Hoene; Polish; Miss Lipsey, South African; Skept, a Briton; Capt. Hautmeyer, pilot; Engineer Verkerk.

The plane, heading into a heavy fog which cut visibility to little more than 20 yards, ripped the roofs of two houses in nearby Purley, severed across a street, sheared off a large tree and finally embedded itself in an unoccupied house. The engine, ripped from its mounting, smashed through the front wall.

The wreckage burned furiously, one crumpled wing of the machine hanging grotesquely from a house, while other parts of the plane blocked the roadway.

It was the most disastrous air crash of the year in England.

The New King

The Duke Of York Will Be The New Ruler Of The Empire

London.—With the abdication of King Edward VIII, the Duke of York will be the new King of Great Britain and the Dominions.

A prince well known to the British people as a quiet, persistent worker for the well-being of his countrymen in factory and mine—an "industrial prince"—is the man now in line for the throne.

Albert, Duke of York, has had to take more of the limelight than ever—and considerably more than he likes—because of the historic crisis brought on by governmental opposition to marriage between King Edward and Mrs. Simpson.

As Prince of Wales, Edward, the duke's brother, specialized for a time as an international travelling salesman for the products of his country, often called the "workshop of the world."

But the duke, next in line for the throne, looks not abroad but at home for his specialization. He has concentrated upon the daily lives of workers striving to make them happier. He has been "working president" of countless organizations, chief among them the Industrial Welfare Society.

This society was formed, he once said, for "cementing that fellowship between individuals in all walks of industry, irrespective of class or occupation, which is the backbone of our imperial progress."

"Nothing is more important to the security and prosperity of the Empire," he said at another time, "than the keeping up of a high standard of industrial welfare."

Like his father, George V, the duke is patient and shrewd. Tributes are paid him for his "ungrudging devotion to public service."

Through his devotion, he has learned much of some of the hardest national problems and has been active in contributing to their solutions.

Like his father, also, the duke was trained mainly for the navy, not the throne. He had to be ready to take the throne should the occasion arise, but always he faced the problem of intense training for a position he might never fill.

At the same time, in contrast to Edward, who had only himself to think of in training for the throne, the duke has had to guide his own heir, Princess Elizabeth.

Hands Off Spain

Want Plebiscite To Decide The Civil War Issue

London.—German charges 35,000 Soviet citizens now are in Spain and that many Soviet officers are fighting for the government cause were made at a session of the international "hands off Spain" committee by German ambassador Joachim von Ribbentrop.

Soviet ambassador Ivan Maisky replied that 6,000 trained and equipped German soldiers allegedly were fighting for the Spanish insurgents.

Britain and France meanwhile strove to win assurance from Berlin, Rome and Lisbon that these three governments would join in an agreement not to interfere in Spanish affairs in any way and thus lead to mediation for a truce and a national plebiscite to decide the civil war issue.

An official note from Moscow promised Russia's support of this plan if the other powers also agreed to it.

An indication of Germany's support came from Von Ribbentrop, who told the committee "Germany fully supports" the appeal to check an influx of foreign volunteers to Spain.

Called To Trial

Jewish Medical Student Charged With Assassination Of Nazi Leader

Chur, Switzerland.—David Frankfurter, 27-year-old Jewish medical student, was called to trial charged with the assassination of Wilhelm Gustloff, leader of the German Nazis in Switzerland.

The public prosecutor's office, as the trial got under way, announced it would demand a sentence of 18 years imprisonment rather than the maximum punishment of a life term.

"My bullets should have struck Hitler himself," the police quoted him as saying.

The death of the Nazi leader created an international sensation and drew an official protest from the German ambassador.

Floral Emblem For N.B.

Frederickton, N.B.—New Brunswick has joined other Canadian provinces having official floral emblems. The provincial government selected the purple violet as the official flower for this province.

Elected Mayor Of Vancouver

Alderman George Miller Defeats Three Other Candidates

Vancouver.—Alderman George Miller was elected mayor of Vancouver, defeating three other candidates, Alderman L. D. McDonald, C. E. Thompson and former mayor L. D. Taylor.

Miller, with 16,028 votes, had a plurality of 3,985 over McDonald, his nearest opponent with 12,043. Thompson got 5,593 and Taylor 3,993. The total vote was 37,957 against 44,687 two years ago when McGee defeated the then mayor, L. D. Taylor, by 25,000 majority.

Mr. Miller will take office Jan. 1, succeeding G. G. McGee, M.P., who declined to run again and gave his support to Miller.

The successful candidate has been chairman of the civic finance committee for three years, a member of the city council for eight, and acting mayor during absences of Mr. McGee.

KING EDWARD HAS RENOUNCED BRITISH THRONE

London.—King Edward VIII has abdicated. The announcement was made by Capt. Edward Algonzo Fitzroy, Speaker of the House of Commons.

The Duke of York will succeed his brother as king. He will bear the title George VI.

Prime Minister Baldwin prefaced the announcement by telling the members he had "a message from His Majesty the King signed by his own hand."

King Edward's words, in renouncing the British throne, the Speaker read, were:

"I have determined to renounce the throne.

"After long and anxious consideration I have determined to renounce the throne to which I succeeded on the death of my father and I am now communicating this, my final and irrevocable decision.

"Realizing as I do the gravity of this step, I can only hope that I shall have the understanding of my people in the decision I have taken and the reasons which have led me to take it.

"I will not enter now into my private feeling but I would beg that it should be remembered that the burden which constantly rests upon the shoulders of a sovereign is so heavy that it can only be borne in circumstances different from those in which I now find myself.

"I conceive that I am not overlooking the duty that rests on me to place in the forefront of public interest when I declare that I am conscious that I can no longer discharge this heavy task with efficiency or with satisfaction to myself."

For Edmonton unemployed

Edmonton.—Brain trusters were in demand here in the wake of city council approval for formation of an "ideas" committee to map a works program for Edmonton unemployed.

Representative business men were being called on to assist in determining the best method of taking jobs off relief and putting them to work at fair wages.

Edmonton.—Brain trusters were in demand here in the wake of city council approval for formation of an "ideas" committee to map a works program for Edmonton unemployed.

Representative business men were being called on to assist in determining the best method of taking jobs off relief and putting them to work at fair wages.

KING ABDICATES

King Edward VIII, who announced abdication of the throne.

Ontario By-Election

Conservative Candidate Wins In Campaign In Hastings East

Madoc, Ont.—Dr. Harold E. Welsh, Conservative, 40-year-old country doctor from Roslin, Ont., was elected member of the Ontario legislature for Hastings East over his Liberal opponent, Dr. H. A. Boyce of Deseronto, after a hard fought provincial by-election.

Election of Dr. Welsh to the legislature seat left vacant by the death of J. F. Hill, Conservative whip, was conducted by James Cox, Liberal campaign manager.

Dr. Welsh took an early lead in the voting, which followed one of the hardest fought political campaigns in Ontario's history. Premier Hepburn and Conservative Leader Rowe led the fight.

Asserting the handwriting was "clearly on the wall for the Hepburn government," Mr. Rowe said: "A general election with the ministry unable to provide voters two years of patronage as it has done shamelessly in East Hastings over the past three weeks, will unlose the full fury of the storm of public dissatisfaction with Hepburnism in all its irresponsible phases which is gathering throughout the province."

Col. Drew said if the premier had any regard for the future welfare of our people he will call a general election without delay so that those questions which he unfortunately forced into politics for the first time in more than half a century may be settled once and for all."

Joins Britain And France

Russia Accepts Mediation Plan Regarding Spanish Civil War

Paris.—The Soviet Union has agreed to join with Great Britain and France in mediation of the Spanish civil war, and will refrain from any form of intervention in the conflict, Moscow officially informed Paris.

A Soviet note to the French foreign office announced acceptance of the mediation plan "without reservations" and declared Russia is ready to abstain from direct or indirect intervention in the war provided strict neutrality control guarantees similar abstention by other powers.

ITALIAN MINISTERS VISIT ABYSSINIA

Ethiopian children, some of whose fathers probably fell before Italian bullets less than a year ago, waving flags when the Italian Ministers of Colonies, and Public Works, and the Viceroy, visited Fascist headquarters and attended a march-past of Ethiopian youth at Addis Ababa.

Rush Supplies To Philippines

Medical Relief Carried By Plane To Flood Area

Manila.—Military airplanes sped medical supplies and relief-survey representatives to the flood ravaged Cagayan valley where thousands of residents were reported dead or missing in what army authorities said was the Philippines' greatest disaster.

As three planes of the United States and Philippine armies hopped off for the stricken area, additional meagre reports said many other villages were flooded in addition to the 54 reported inundated.

Whole families were wiped out, crops and live stock washed away and untold damage inflicted by fast-rising flood waters that rushed down the treacherous Cagayan river as the aftermath of a typhoon.

Army air service relief was ordered when it became known that waters covered a rich farming area more than 100 miles long. Regular communication systems were wiped out.

Touche High Record

Canada's October Gold Production Was Valued At \$11,689,459

Ottawa.—Mills of Canada's mines ground out a new monthly high record for gold production in October. The figure of 334,080 ounces shattered September's record of 330,820 ounces. At the average price of \$34.99 an ounce, Canadian funds, in London October output had a value of \$11,689,459.

For the first 10 months of 1936, production was 3,080,611 ounces, up 14.8 per cent. from 2,683,985 ounces in the same period last year.

Manitoba and Saskatchewan registered an advance of 10.8 per cent. in the month with 18,891 ounces. Alluvial gold production in the Yukon was 7,446 ounces.

French Chamber Passes Bill

To Prevent Press Waging Campaigns Against Public Figures

Paris.—The French Chamber of Deputies, by a vote of 359 to 193, adopted in its entirety, a bill to prevent newspapers from waging such campaigns against public figures as recently led to the suicide of Foreign Minister Roger Salengro.

In the discussion which preceded the vote, the chamber inserted a clause establishing penalties for printed or published agitation in any form against French authority in the colonies.

CANADA HOLDS HIGH PERCENTAGE OF WHEAT TRADE

Winnipeg.—High percentage of the world wheat trade held by Canada despite decline in world imports was disclosed to the Turgerson royal grain commission in comparative statistics submitted by James McAnsh, statistician of the Canadian wheat board.

Further evidence was given by C. Davidson, secretary of the Canadian wheat board, and Dr. W. F. Geddes, chief chemist of the board of grain commissioners.

Mr. Davidson pointed out a major factor in contraction of world trade in the 1929-32 period was the huge decline in United States imports. In 1929 the United States imported merchandise worth \$4,399,400,000 compared with \$1,322,000,000 in 1932. In recent years U.S. imports were increasing, he said.

Dr. Geddes told the commission maintenance of the high quality of Canadian grain would assure the Dominion a leading place in the world markets. Search for rust and drought resistant wheats indicated Canada's intention of producing the highest quality grains grown.

Canada, said Mr. McAnsh in submitting statistical data, secured an annual average of 38.92 per cent. of the world wheat trade in the period 1925-29. The United States took 20.8 per cent., Argentina 20.3 per cent. and Australia 10.7 per cent.

The annual average during the 1930-34 period showed Canada's share declined to 32.48 per cent. but it was still larger than that of other countries. The U.S. share declined to 8.74 per cent., Argentina increased to 21.67 per cent. and Australia to 19.49 per cent.

In a comparison of United Kingdom imports, Mr. McAnsh pointed out Canada supplied 42.86 per cent. annually in the 1925-29 period, Argentina 22.83 per cent., Australia 11.46 per cent. and U.S. 15.86 per cent. In the 1930-34 period, the percentages were 34.86 for Canada, 21.84 for Argentina, 20.96 for Australia and 3.92 for U.S.

PRESTIGE OF BALDWIN IS AT HIGHEST PEAK

London.—Prime Minister Stanley Baldwin's prestige in the House of Commons appeared at the highest peak of his long career in public life. Members of parliament acclaimed as a personal triumph for the grim, stocky "country squire," the manner in which he handled the revelation and background of King Edward VIII's abdication.

Quickly, the comment in the lobby turned to a discussion whether the prime minister, at the flood tide of his prestige, would seize this opportunity to retire from public life as he has frequently threatened.

Political talk has long held that tall, lean, Neville Chamberlain, chancellor of the exchequer, was being groomed to take over the reins.

Chamberlain, half-brother of former foreign minister Sir Austen Chamberlain, is a bulwark in the Conservative party which is the power behind the National government.

But the talk of the prime minister's possible retirement and of Chamberlain's succession to his post was overshadowed by the tributes for Baldwin.

The prime minister was acclaimed by members of all parties as having handled probably the most difficult problem of its kind that ever confronted a man in his position.

They paid tribute to him for his convincing, statesmanlike manner and said he added prestige to parliament without offending the sovereign.

Labor, the official opposition, held a hearty conference in which it was stated later, majority of the members supported Baldwin throughout.

A handful, including James Maxton, chairman of the Independent Labor party, and George Buchanan, Independent Labor, also seized the opportunity to denounce the whole institution of royalty.

But Baldwin, his fellow members in the commons stated, carried the day by appearing to deal with the problem almost as if it was a family affair in which every member was equally concerned.

First To Abdicate

Edward VIII, First King Of Britain To Abdicate In More Than 500 Years

London.—Edward VIII, became the first king of Great Britain to abdicate in more than 500 years, ending the shortest reign since that of Lady Jane Grey, queen for 14 days in 1553-54. Edward, ruled for 11 months.

The only other abdication involved Richard II. But Richard's abdication had nothing to do with the love of a woman. He reigned despotically and was hated throughout the country. Henry of Bolingbroke led an uprising while Richard was in Ireland crushing a revolt.

When he returned, Henry was master of the country. Richard, last of the Plantagenets, surrendered and abdicated in 1399 to be succeeded by Henry IV, first of the Lancastrians.

In 1688 James II. fled to France before the rising threat of William of Orange against the great seat of England into the Thames. In exile he always regarded himself as king. Parliament decided he had "forfeited" the throne and not abdicated.

No king of England until Edward voluntarily abdicated. He is the first king to give up his throne to marry the woman he loved and will go down in history as one of the most popular monarchs in the history of the realm. He was the first bachelor king of Great Britain since Edward VI, the son of Henry VIII.

History has to turn to the Holy Roman empire for a case that in any way parallels that of Edward VIII. There, weary of struggles and wars, Charles V. in 1558 resigned as emperor to enter a monastery.

School Building Collapsed

Forty-Four Children Killed And 800 Seriously Injured

Lisbon.—Forty-four children were killed and 300 seriously injured when a school building in the village of Porto de Moz collapsed and buried 500 persons under tons of debris, it was learned.

The catastrophe occurred during ceremonies marking the anniversary of the founding of the Catholic Action in Portugal.

Most of the victims were between nine and 10 years of age.

The Crossfield Chronicle
ESTABLISHED 1907

TODAY'S THOUGHT

Kind words produce their own image in men's souls, and a beautiful image it is. They soothe and comfort the hearer. They shame him out of his unkind feelings. We have not let begun to use them in such abundance as they ought to be used.---Pascal.

Christmas Spirit

ANOTHER CHRISTMAS is nearly upon us, and what are we going to do this year to try and make it a brighter Christmas for these more unfortunate than ourselves.

As we scan the columns of this paper, and other papers, we find that, this school is having a concert, this one a play, and this one something else. To whom is the credit due, well, first, chiefly to the enterprise of the Teacher, secondly, to the various Boards of Trustees who give the teachers every assistance.

Piffle, Rot, Rubbish, is some of the comments we hear from people who should know better, and then again, on the other side, we hear the warmest commendations.

How many of us stop and realize just what our Teachers do with the children at Christmas time, providing little joys to make little hearts merry, and, in some localities the sole gifts and entertainment that the kiddies receive, are those they get from their School Teacher.

It's a trying time for many of the teachers what with term examinations and tests, and preparation for the Christmas Concert, their own spare time if fully taken up, and when all is over, can you blame them heaving a sigh of relief and turning to their holiday rest with longing. We venture to say, that with all this extra work, there is not a teacher who would forego it, nor lose the chance to bring a little happiness into these young lives.

Sunday last, over one of the big U.S.A. Radio Networks, Mayors in 101 cities throughout U.S.A., Canada and Honolulu, at a given signal gave a three-minutes talk on the real Christmas Spirit, urging those who have to share with those who have not.

Let us then, help the best we can, if we have material assistance to give, let's give it, but if we have not, then a cheery word of encouragement, a kindly shake of the hand may strengthen a heart that is breaking with sorrow.

So should it be with us all, as we have been blest, let us share in a like manner with those a little more unfortunate than ourselves, and into this Christmas bring that real Christmas Spirit, the Spirit of "It is more blessed to give than to receive."

The Love of Books

OF THE things that make for happiness, the love of books comes first. A book, unlike any other friend, will wait, not only upon the hour, but upon the mood. It asks nothing and gives much, when one comes in the right way. Is your world a small one, made unendurable by a thousand petty cares? And the heart and soul of you cast down by bitter disappointment? Would you leave it all if only for half an hour, and come back with a new point of view? Then open the covers of a book.

Announcement

Mrs. H. McKenzie, wife of the late Hector McKenzie, announces the engagement of her third daughter, Edith May, to Mr. Kenneth L. Gilchrist, second son of Mr. and Mrs. J. R. Gilchrist, late Crossfield. The wedding will be solemnized in the United Church, Crossfield, Saturday, December 19, at 2 p.m.

William Russell Again Brings Home Prize

William Russell took third prize with his stallion, "Derwent Sensation," at the Toronto Winter Fair. When it is recalled that his horse competed against imported horses and also had a long journey of six days it is a creditable showing.

In Memoriam

In loving remembrance of our dear Mother, Margaret Chatham, who died December 19, 1928.

"A loving mother, true and kind
A beautiful memory left behind."

Inserted by her son and daughter-in-law Mr. and Mrs. H. A. Bannister.

Dr. S. H. McClelland Leaves for Calgary

Dr. S. H. McClelland, Veterinary Surgeon and for a number of years local Druggist, left Crossfield for Calgary on Monday morning, where he will enter business in the Farm Feeds line. Mrs. McClelland will be remaining in Crossfield for a little while longer in connection with business matters.

OLD MAN WINTER

BUILDING SUGGESTIONS FOR WINTER COMFORT

SNOW, COLD, BLIZZARDS AND SLEET ARE ON THE WAY! PUT YOUR HOME AND BUILDINGS IN GOOD SHAPE NOW TO WITHSTAND WINTER WEATHER! WE CAN FIX YOU UP RIGHT WITH DRY LUMBER AND BUILDING MATERIAL SPECIALS FOR WINTER

STORM DOORS & STORM SASH

Storm Doors and Storm Sash keep out the cold, keep in the heat, and cut down on your heating bill.

No matter the size or pattern, we can fill your order!

Your home can be equipped throughout at very low cost. Allow us to quote you prices on your Storm Doors and Storm Sash.

COMBINATION DOORS

Combination Doors mean comfort and economy for you. They are smart in appearance. A Combination Door is Two Doors in One—one door for Summer and one for Winter.

The change over takes but a minute. These Doors are not high priced. The low cost will surprise you.

HOG HOUSES

Hogs still mean good revenue for you! Put your Hog Houses in good repair, so they are free of damp and drifts. Give your hogs every chance to thrive.

There are many types of Hog Houses. We can advise you as to the type of construction that will meet all requirements—and at a minimum cost. We stock all the materials you require. You will find our prices reasonable.

LATH, PLASTER, CEMENT, LIME AND STUCCO

We stock them! Get your requirements at Our Yard and Save Money! Clean up on these unfinished Building Jobs this winter.

Insulate your home for economy and comfort. If you Insulate now, you pay but once!

If you don't insulate now, you pay yearly!

Insulation means more comfort in the home—and lower fuel bills.

We stock the best Mineral Insulation. It is fire-proof, and vermin-proof.

BARN BUILDINGS

Good Barn Buildings are essential on a farm! They are half the battle in your every-day work!

No matter the type, or size of Barn you have in mind to build, it will pay you to consult with us.

Put your present Barn Buildings in good shape, against winter weather. Buy your Lumber from us, and you are sure of getting the Best your money can buy.

MODERN INTERIOR HOME IMPROVEMENTS

There are many improvements you have in mind—For the Pantry—Kitchen—Hall—and Living Room! We can have these Millwork Fixtures made for you right in our own factory, or you can make them right in your own home with select materials from our sheds.

BRITISH COLUMBIA RED CEDAR SHINGLES

Fix up your old Roofs. Put them in sound repair for winter. Roofs can be put in good repair at very low cost.

Use our Dry British Columbia Red Cedar Shingles—AND YOU MAKE NO MISTAKE. Good Buildings deserve Good Roofs!

WE TAKE THIS OPPORTUNITY OF EXTENDING TO OUR CUSTOMERS IN THIS DISTRICT OUR BEST WISHES FOR A REAL MERRY CHRISTMAS AND FOR A HAPPY, PROSPEROUS 1937 FOR YOU AND YOURS

YOU ARE INVITED TO VISIT OUR YARD AND INSPECT OUR STOCKS. WE ARE AT YOUR SERVICE AT ALL TIMES.

WE STOCK EVERY KIND OF LUMBER YOU REQUIRE. ALL BONE DRY—GOOD GRADE PROPERLY MILLED—AND READY FOR IMMEDIATE USE.

BUILD FOR PERMANENCE! FOR YOUR LARGER JOBS, DO YOUR PLANNING NOW! BE READY TO BUILD IN THE SPRING!

Letters to the Editor

As an act of courtesy "Letters to the Editor" are published, but the Chronicle cannot be held responsible for the opinions expressed

Crossfield, Dec. 15, '36
The Editor,
Crossfield Chronicle.

Sir:
After devoting the biggest part of your paper to the question of a Community Hall for Crossfield, and asking for suggestions and ideas, the lack of enthusiasm shown, makes it quite evident that the community, as usual, is willing to sit back, and, as the saying goes, "Let George do it."

Now, an undertaking of this size is not a job for one or two to tackle, but needs and must have the support of everyone in the district, if it is to be made into a successful and paying proposition.

Undoubtedly, it could be made to pay for itself once it was built, the amount of money the young folks are spending on amusements would take care of that, but it must be to the older folks that we look for the wherewithal to start the project.

The Directors of the U.F.A. Co-operation Association are quite willing to enlarge the hall over their store, and, after being in conference with them, I am convinced that they have the interests of the community at heart and would do anything that could reasonably be expected of them.

Not being in business altogether for their health's sake, they naturally want to know how much revenue they might expect to get from the hall if, and when, it were enlarged.

It has been suggested that the Legion might build a Memorial Hall, but it should be borne in mind that there are only a few of us, and sad to say, getting fewer, and judging from the poor response your appeal received, going into the dancehall business might be a very burdensome load for those few to carry.

This does not mean that the Legion drops the idea altogether, but is just to show how little support has been made manifest, and to let the people of the community know that if they want a hall they will have to do a little of the digging

Very truly yours,
Harry May.

To the Shareholders of the Crossfield Mutual Telephone Co.

This being the last month of our financial year, the Board of Directors would appreciate if all Shareholders will endeavour to have their Telephone Account in good standing before December 31st.

FRANK LAUT, President. (13c)

LET GEORGE DO IT

Cheer up, there're better days for us
Our troubles reach the end
No need to worry and to fuss
Just watch our fortunes mend.
For George is there to show us how
And works his mighty brain
In teaching us how we should plow
And sow and reap our grain;
How we can make a million bucks
In just a little while
By raising chickens, geese and ducks
If we adopt his style
How we can gather heaps of cash
By simply selling eggs
The bankrupt farmer near the crash
Will soon be on his legs.
Now George could make this coin himself
And draw his princely pay;
But he forgoes this mighty wealth
In his liberal way,
For he prefers—the generous cuss—
To draw his meager pay—
And leave the profits all to us
"T" was ever George's way."

Trees Available For Farmers

In connection with the statement of the Alberta Government published last October regarding certain types of trees being available to farmers for transplanting, it was learned in an interview given to-day by the Honourable C. C. Ross, Minister of Lands and Mines, that a large number of Lodgepole Pine, and to a lesser extent Scotch Pine, are still procurable from the Forestry Division of the Department. As a result, applications for these two species for transplanting next spring will continue to be received up to January 31st, 1937.

The stock referred to is stated to be large and healthy. It is available only for additions and replacements in windbreaks and natural bluffs. Application forms are obtainable from the Director of Forestry, Department of Lands and Mines, Edmonton.

Attention! Milk Vendors

It is requested that outstanding Milk Vendors' Licenses be paid before the end of December, 1936.

The World of Wheat.

By H. G. L. Strange
Director "Crop Testing Plan."

ARTICLE ONE

Following factors have tended to raise prices: Large purchases of wheat by United Kingdom and Continent—Rumor Great Britain and other countries intend stocking up with wheat—Broomhall increases his estimates world imports by 16 million—Drought in parts U.S.—A. winter wheat belt continues—World's rye crop estimates less than last year—South African maize crop considerably less than last year.

These factors have tended to lower prices: Large wheat crop seeded under favourable conditions in India—Argentina harvesting starts with clear weather on increased acreage; good threshing yields reported—Argentina suspends guaranteed minimum price to farmers on wheat and linseed—Greatly increased exports of vegetables from Cuba to U.S.A.

ARTICLE TWO

Prices have tended to be raised by the following: European Countries buying wheat heavily—Fear of war in Europe continues—Private estimates Argentina crop lower than expected—China starts purchasing wheat—Germany purchases Canadian wheat under new trade agreement—Fears that rust epidemic may develop in Western Canada should rains occur next summer heavy enough to overcome present lack of subsoil moisture.

Prices have tended to be lowered by the following: Harvesting of wheat now general in Australia—Seeding of Italy's crop proceeding favourably—Rains occur in North Africa—India shipping barley heavily—Argentina and Danubian countries make heavy shipments of maize and rye—Rains benefit newly sown Indian crop.

BOOKS (Continued)

The week before last I spoke about Books. To choose some plan of reading and try and find out what your tastes are and read along certain lines. Let us have a look at what Royalty reads.

The relaxed hours of the late King George were enlivened by Edgar Wallace and P. G. Wodehouse. Biographies and tales of the sea were among his choices, the latter coming naturally from his seafaring youth.

Queen Mary is regarded as the intellectual of the family. She is a "collector" and a furnisher, so her reading is extensive in such fields. Princess Mary and her brothers were early encouraged, by their mother to read, the Princess Mary has a preference for Galsworthy amongst Novelists. Kipling wins the heart of Edward, Duke of Windsor. He possesses Kipling's works in de-luxe editions, but his library is well stocked with books on sports.

The present King, George VI, likes to read works on economics, co-partnership and industrial welfare. The Duke of Gloucester likes books on Military history, while the Duke of Kent is the modernist of the family, clever as a linguist, his tastes affects many phases of romantic and continental literature.

Does Honesty Pay?

Usually, the answer is as obvious as the fact that two and two make four, no matter how you try to get any other total. Is there a substitute for honesty in our friends, our neighbours, our business associates? Would not the very foundations of our everyday life topple without the trust and faith we put in the word of others?

Sometimes, in our haste to attain a certain difficult objective, we may overlook certain factors. Perhaps it is wise then that we should stop now and ask ourselves that simple yet essential question, "Does Honesty Pay?"

An individual certainly makes little progress if he consistently adopts a policy which is not fundamentally honest. Therefore, does it not follow that a group of individuals would suffer the same penalty if it adopted a similar policy?

In other words, can two wrongs ever make a right? Can this province afford to pay the penalty of breaking faith with those who accepted our word in good faith? Will the immediate gain be more than wiped out by loss of our individual and collective honesty in the immediate future in the eyes of those to whom we MUST eventually go for financial support?

The answers to these questions concern every man, woman and child in Alberta today. Our future and our children's future is at stake.

This statement is one of a series written by The Mortgage Loans Association of the Province of Alberta. The Association is composed of 34 member companies. It represents hundreds of thousands of small investments by typical Canadians. Its loans to citizens of Alberta amount to some forty-five million dollars.

(The fourth statement in this series will be published in two weeks)

Value Of The Farm Is Recognized As Foundation Of Our Material Civilization

"Christmas and the Farm: the Farm and Food."

Christmas should see a revival of this ancient Christmas toast. Those were the days when the value of the farm was universally recognized, but in the whirl of modern life the farm, as the sure foundation of material civilization, is apt to be forgotten. The word farm means food and was so called because in older times the tenant was required to provide the landlord with food by way of rent. To-day this definition has been considerably extended in that the farm supplies the nation with food, and without food, without the feeding of the multitude, it is not given to human beings to be able openly to express that spirit of universal kindness and peace and good will evoked by the teachings of the Master in the celebration of the festival of Christmas.

The connection between agriculture and Christmas has been intimate from the beginning. It was to shepherds watching their flocks by night that the words "Fear not, for behold, I bring you good tidings of great joy" were addressed. It was in a lowly stable attached to a farm, where the Saviour of the World was born, and a few days later it was on the back of the most humble farm animal, the ass, that He was borne to Egypt in safety.

It was from the agricultural population mainly that the early Christians drew their adherents, and many years later it was over the farms and orchards in the vicinity of Rome that the early Christians scoured the country in search of holy branches to decorate their churches and dwellings at Christmas.

Meanwhile, the farm, as ever, continued to furnish the wherewithal for the feast, and at the same time, as centuries rolled by and towns became swamped with industrial activities, it was the farm that kept alive the kindly, ancient rites of the feast. Many centuries later, Charles Dickens restored to the townfolk of England something of the joy and beauty of the spirit of Christmas which flourished among agricultural communities. Even to-day many of the ancient agricultural Christmas celebrations, as distinct from the towns, survive, some of them under limited conditions. There is Plough Monday, for example, which is still observed in several countries, including the British Isles. In olden times in Europe, Plough Monday marked the end of the Christmas holidays. It was held on the first Monday in January after the Twelfth Day. It was customary on Plough Monday, before the ploughman returned to work on the following day, to draw a plough from door to door of the parish to solicit "plough money" to spend in a frolic. The queen of the banquet was called Bessy.

Then there was the ancient feast of the boar's head which still exists in at least three distinct communities in England—at Queen's College, Oxford, on Christmas Day, and at the annual Christmas banquets of the City of London at the Guildhall and of the Worshipful Company of Cutlers in London. The proceedings are much the same. Trumpets sound and the boar's head is carried in procession, escorted by choristers singing the old carol "The boar's head in hand bring I." At the City of London feast, the master, takes the lemon from the boar's jaws and at Oxford the Provost takes the orange and presents it to the principal singer. At the Cutlers' Hall, the president of the feast accepts the present of a pot of mustard, and extols the circumstances of the feast. This reference to mustard must be very old, because in a carol that had been in vogue for centuries before, Wynkin de Worde printed the words in 1521 A.D., the last line of which runs "The boar's head with mustard."

The phrase "Christmas Box" originated in the early Christian times. It was really then a box which was placed in the church for promiscuous charities and was opened on Christmas Day. The contents were distributed the next day (Boxing Day) by the priest, and where the contributions consisted of cash were known as box money. However, farmers were accustomed to leave their contributions in kind, eggs, butter, flour, meat, and other agricultural products, much the same as the farmers of Quebec to-day place fruits at the church entrance on Thanksgiving Day, the results of the sales of which go towards masses for the souls of relatives. In many churches in Canada, the accumulation of Christmas gifts is distributed in

much the same manner as in the earliest Christian days.

And at this Christmas, as in the days gone by, the farm has furnished the chief necessities for the Christmas feast, such as the meat, the turkeys, the geese, the ducks and chickens, the cereal foods, the vegetables, the cream, milk, eggs, and cheese, not forgetting that many of the other essentials, the candies and confectionery, the pickles, cigars and cigarettes, are all of agricultural origin.

So once more, the ancient toast: "Christmas and the Farm: the Farm and Food."

High Grade Wheat

Protein Content Of 1936 Crop Was Highest On Record

Protein content of the 1936 red spring wheat crop in western Canada is the highest on record, while the crop of 1927, had the lowest protein content, according to the annual report issued by the grain research laboratory of the board of grain commissioners for Canada.

Samples tested since the new crop commenced to move from farms numbered over 9,800, taken from various shipping points in Manitoba, Saskatchewan, Alberta and British Columbia. The collections were restricted to grades Nos. 1 hard to 4 northern, inclusive, and Nos. 1 and 2 Garnet.

The most notable feature of the analysis conducted during the season was the high level of the protein content. The general mean average for the crop is 14.9 per cent, or 1.0 per cent higher than that recorded for any of the previous surveys. The report points out that the extremely high protein content of the 1936 crop is directly attributed to hot, dry weather, which prevailed through western Canada during the growing season.

There Is A Reason

Why Women Can Stand Cold Better Than The Men

If the first winds of winter make you shiver under a heavy overcoat while your neighbor goes breezily about wearing a light sweater, blame it on your metabolic counts.

Dr. J. H. J. Upham, president-elect of the American Medical Association, said that most persons complaining of the cold had low metabolic counts. But this doesn't explain why a man reacts differently at low temperature than does his wife, said the doctor.

"There is under the skin of girls and women, a layer of fatty tissue which not only gives them a feminine roundness, but helps to keep body heat in and cold out," he said. "That explains why a woman can be comfortable wearing a light dress, while her husband, clothed in a wool suit weighing two or three times as much, is chilled."

Fight With Lion

Trained Lion Mauls Dancer In Baltimore Theatre

A trained lion mauled and bit Gladys Cote, dancer from Chicago, at the close of an animal act on the stage of a Baltimore theatre.

Dr. Noble Hamilton, the animal trainer, fought the unruly lion off with a chair after emptying two pistols loaded with blanks at the eight lions in the cage. Stage hands dragged Miss Cote, who had fainted, out of the cage.

She suffered severe lacerations. Her condition was described as "satisfactory."

The curtain was dropped during the commotion. Bob Dupont, a juggler, went on with his act as shots, shouts and the roar of the lions came from behind the curtain and the audience remained seated.

A Matter Of Principle

When William died suddenly the neighbors were shocked, and a kindly woman proceeded to comfort William's wife by describing his good points.

"He was such a man of principle," said the neighbor.

"And am I not the one to know it?" said the bereaved woman.

"Every Saturday night didn't he come home and place his pay envelope in front of me as regular as clockwork? Not a night did he miss all the time we were married. Of course, the envelope was always empty, but look at the principle of the thing!"

Native of Africa speak more than 275 languages.

FAMOUS ARTIST EXAMINES SELF-PORTRAIT

Sir John Lavery, famous British artist, examines the picture he painted depicting himself visiting Shirley Temple in Hollywood. The picture is shown in the exhibition of the Royal Society of Portrait Painters at the Royal Institute Galleries, London.

Presents Big Problem

Mating Qualities Of Canadian Barley Are Being Studied

While the advent of the smooth-awned barleys which have been evolved by Canadian scientists for Canadian soils has been enthusiastically hailed as a signal advance in barley improvement, there still remains the mating quality problem. The barley crop in Canada is used mostly for feed and farmers and feeders both are pleased with the smooth-awned varieties. On the other hand, the mating trade, which uses about ten per cent of Canadian barley, looks with disfavor on the new varieties, and the problem which now faces growers is to produce new varieties which possess all the favorable characteristics of the present smooth-awned varieties and have in addition high mating qualities.

The problem is a big one and is responsible for the new barley breeding activity in Canada. At the University of Saskatchewan two very successful crops of hybrid barleys were raised during the 1935-36 winter, and a total of 325,000 second hybrid generation seeds of six different crosses was produced. In the spring of 1936 these seeds were sown, and 5,000 of the most promising plants are at present being tested in the cereal breeding laboratory of the university. As a result of this and other barley improvement projects now under way in Western Canada, it is expected that high-yielding, smooth-awned varieties with high mating attributes will be produced within the next three or four years.—Brandon Sun.

Idea For Beekeepers

Soy bean meal mixed with powdered skim milk has been discovered by University of Minnesota scientists to be a good pollen substitute for bees in certain seasons shortage of natural pollen for active brood rearing in the spring is an acute problem among Minnesota beekeepers.

Two seedless watermelons were produced in North Dakota at an agricultural experiment station this year.

An Exclusive Alice Brooks Design

PATTERN 5748

Behold—the latest headlines in crochet—a turban and purse to match! A large hook—a loose stitch—make "quick work" of this smart pair. Both accessories are in single crochet, only the rope-like trim in one or two colors being in a different stitch. Use chenille or Germantown. Dent, crease or point the crown for this turban's as changeable as your varying moods. Then, set it atop your crown, tuck the bag under your arm, and you're ready for any outing! In pattern 5748 you will find instructions for making the set shown; an illustration of it and of all the stitches used; material requirements.

To obtain this pattern send 20 cents in stamps or coin (preferably to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg).

There is no Alice Brooks pattern book published

Soy Bean Cultivation Will Provide Winter Work For Farmers Says Henry Ford

Has Become Big Business

Great Variety Of Pets Handled By Express Companies

Transportation of pets has become a huge business in United States, and of estimated 11,000,000 dogs alone, hundreds of thousands travel yearly by rail, declares C. R. Graham, vice-president of Railway Express Agency, in a report just issued. However, not only dogs travel, as lion and leopard cub pets and pet pythons are included in the wide variety handled by the expressmen.

"Large individual breeders in various parts of the country ship from 100 to 150 dogs daily to purchasers and pet shops, and a surprising number of families carry their dogs with them on their travels," says Mr. Graham. "The dog is the most traveled of all animals, like humans, dogs differ in their travel capacities. The bulldog, usually good natured and stolid, stands travel well, while sensitive, high-spirited collies, setters and some of the terriers and small house dogs require greater care. They are as temperamental as opera singers, and expressmen must remain very calm, quiet and unobtrusive in handling them."

"Strangely enough," Mr. Graham continued, "few animals stand travel even better than dogs. They seem to have the power to withdraw into themselves and doze through most of a trip while the dog, with his more developed mentality and emotions, is usually on the alert for strange sights, sounds and smells, from which he builds up his more vivid world. Even though the wild animal senses are 'knees' down the dog's, the brain which receives and interprets their testimony is far less so. Many dogs seem to possess, at least intermittently, what intelligent humans would consider the power of thought."

"The express man never knows what to expect, or what shippers will consider 'pet'! But if he has been in the service long, he has had so many unusual experiences that he becomes impervious to them. And the chances are at least 99 to a 100 that you won't see anything that he doesn't know how to handle."

Beechnuts For Cooking Oil

German Children Ordered To Find All They Could

Every German boy and girl was ordered to find all the beechnuts in Germany.

Hermann Goering, as chief of Chancellor Hitler's four-year plan for economic rehabilitation, instructed the entire Hitler youth organization, 6,000,000 strong, to comb the forests for beechnuts with which to make cooking oil and relieve the acute fats shortage.

Russia Buying Sheep

Sheep to the number of 1,560 have been purchased from British breeders, for shipment to Russia, bringing the total of sheep purchased by the Russian Commission to nearly 4,500. Although the Commission may continue buying sheep, it is understood that most of their attention in the future will be confined to the purchase of cattle, particularly Short-horns and Herefords.

Have Always Had Protection

Indian Reserves Established In Canada From Earliest Times

The system of reserves, whereby particular areas of land have been set apart for the use of Indians, has been established in Canada from the earliest times. It was designed to protect the Indians from encroachment and to provide a sanctuary where they could develop unmolested until advancing civilization had made possible their absorption into the general body of the citizens.

Indians are minors under the law. They are wards of the department of Indian affairs. The activities of the department as guardians of the Indians include the control of Indian education, health, etc., the development of agriculture and other pursuits among them, the administration of their funds and the general supervision of their welfare.

According to the last census there are in Canada 122,911 Indians—62,941 males and 59,970 females. About 112,500 live on the reservations.

The department of Indian affairs feels there is no foundation for the common belief that the Indians of Canada are a vanishing race. The census which is taken at five-year intervals has shown a substantial increase in each of such periods during the past fifteen years at least.

Quite Easy To Get

Guardman Found Out How Presenting Arms Caused Jingle

He was a tall, square-shouldered fellow. His moustache bristled, and his steel-gray eyes gleamed when he recounted his army days.

"Yes," he said, looking down at his insignificant companion, "when I was in the Guards the drill was perfect. When we presented arms, all you could hear was 'Slap, slap, click!' Were you in any regiment, my good man?"

"Aye, sort of, ye know. I was in the Lancashire Fusiliers," he replied. "Drill wasn't so bad, ye know. When we was on parade and presented arms, all you could hear was 'Slap, slap, jingle!'"

"That's impossible," the Guardsman exclaimed. "How on earth did you get the jingle?"

"Oh!" replied the man in a modest tone, "medals!"—London Tit-Bits.

Arizona's petrified forest contains 25,625 acres.

A paying winter job for the farmer has been found by Henry Ford. He set out six years ago to develop a system dovetailing with his previously expressed theory that "If we want the farmer to be our customer, we must find a way to become his customer."

While various farm products have been tested for more remunerative commercial uses on the Ford experimental farm, he concentrated heavily on soy beans, previously held valuable only as livestock food.

The oil from the beans was found to contain matter which could be used in making an enamel for painting automobile bodies. It was also found that the oil could be mixed with sand to make foundry cores.

The meal or residue after the oil is extracted, is an excellent food for cattle because of its high protein content of 45 per cent. In the laboratories it was found that it could be used in composition for making plastic mouldings, the horn button, the gear shift lever ball, the distributor case and cover, wind-up trim strips and other moulded articles.

Thousands of gallons of oil and thousands of bushels of meal from beans harvested from the 4,000,000 acres planted in the United States this year will go into industrial products. The present market price of the beans is about \$1.18 a bushel, and the yield varies from 15 to 20 bushels an acre.

"We're still experimenting," Mr. Ford said as he walked through his bean field on one of his farms, just across the road from the house where he was born 73 years ago.

"It is a good crop for farmers. The beans can be harvested after all the other outdoor fall work has been finished. It does not hurt the beans to have them freeze. And they don't require a great deal of cultivation."

Carrying still further his idea that the farmer be open as an industrial worker as well as a supplier, Mr. Ford has developed a processing unit which he believes can be purchased or built by groups of farmers for \$3,000 to \$4,000. The farmers, he contends, can process their beans, extracting the oil, during the winter, when there is little work on the farm. The oil would be sold for industrial purposes, and they can sell the meal or feed it to their livestock, he says.

The process of extracting the oil is simple. The dried beans are fed between rollers which flatten them into thin flakes, and they pass into the extractor, a pipe set at a ten-degree angle. The flakes are ground with water, and the solvent is in the bottom and are forced along by a screw conveyor. The solvent, high-test gasoline, washes out virtually all the oil. The flakes are moved into a steamer, where the solvent is vaporized and driven off by a current of steam. The flakes, now granular, are dried by steam heat and pass on to bags. The oil-laden solvent goes to a still, where the oil and gasoline are separated.

As he watches a press mould distributor covers from the plastic material, the basis of which is soy bean meal, Mr. Ford noted that from each moulding process, under pressure and heat, there was a slight discharge of material.

"Why not make fertilizer from this waste?" he asked. "It has the proper ingredients."

Thus another idea was born, and it is safe to predict that chemists will be developing it.

Research work toward industrial utilization of farm products has only started, Mr. Ford says, hoping for the day when surpluses will cease to be a problem and instead will provide the farmer with cash income for products not used for foodstuffs.

Eskimos Use Old Trick

Turn Back Wolf Packs Stamped

Believes In Alesha Stopping Wolves. An old Eskimo trick helped natives turn back wolf packs which repeatedly stampeded 3,000 reindeer being driven across 500 miles of Arctic wasteland to hunger-stricken Barter Island.

Chunks of frozen tallow were dropped for the pursuing wolves to snap up. Inside each chunk the Eskimos had bent a six-inch piece of whalebone, sharpened to needle point. When the tallow melts, the whalebone opens up, piercing the wolves' stomachs—and slow death is their fate.

Deer for the Barter Island drive were taken from the Point Barrow herd. Several hundred natives and a few whiting were reported near starvation in the Barter Island area last summer.

WORLD HAPPENINGS
BRIEFLY TOLD

For his studies of the chemistry of digestion, Dr. John Howard Northrop, of the Rockefeller Institute for Medical Research, was awarded the Chandler medal of Columbia University.

On a snow-drifted slope of Mount Royal cemetery, Montreal, a cross of sacrifice was unveiled over the grave of General Sir Arthur Currie, Canadian corps commander, and former principal of McGill University.

Announcement was made that the king had approved appointment of Sir Wilfred Wentworth Woods to be a member of the commission government of Newfoundland in succession to Thomas Lodge, whose term of office expires in February.

The Belgian government is considering establishment of a legation at Ottawa and the appointment of Baron Francois Silverruys, counselor of the Belgian embassy in London, as the first Belgian minister to Canada, it was understood.

R. D. Waugh, Manitoba government liquor control commissioner, notified Ontario and Quebec brewing companies licensed in the province all beer brought into Manitoba will be subject of a new tax of \$1.20 a case.

Wage increases of 7½ per cent. for all employees in the Sydney steel plant of Dominion Steel and Coal Corporation and its subsidiaries in eastern Canada and Newfoundland, were announced by Vice-president H. J. Kelley.

Major G. B. Johnson, Canadian trade commissioner to Scotland, said in an interview he believed the Scottish market for Canadian bacon and hams is "ripe" for expansion and Scotland probably is the Dominion's most important market, per capita, for western wheat.

Have Plenty Of Provisions

Trader States Posts Along Arctic Coast Are Well Stocked

Persons living in trading posts strung along the Arctic coast have ample provisions to last another year "by the grace of God and the east wind," according to R. H. G. Bonnycastle, manager of the western Arctic district for the Hudson's Bay Company.

The chief trader, who has ended a seven-year term in charge of fur buying and other duties in the hinterland, reached Edmonton by aeroplane and told how fickle winds changed just in time for supply boats to break through to their destinations and prevent serious situations at the posts through shortage of food.

Thirteen boats were held up until the middle of September at Baillie Island, about 150 miles east of the mouth of the Mackenzie River, because west winds blew flocks of ice from all along the Alaskan coast, Mr. Bonnycastle said. The ice piled up the channels leading to Coronation Gulf and their destinations. The boats were en route east from the mouth of the Mackenzie.

"But we finally got a break and got through," he added. "This was an almost unprecedented year for ice but, by the grace of God and the east wind, we finally made it." An east wind sprang up and after blowing three or four days opened up channels for three Hudson's Bay Company boats—Margaret A., Fort James and Audrey B.—to get through.

Curbing Use Of Butter

Germany Rationing All Fats Under Four-Year Plan

Workers' wants must take precedence over bourgeois stomachs, according to a decree issued rationing fats under the Reich's four-year plan for economic rehabilitation.

"The consumption of fat by the German people is at present considerably larger than in pre-war times," the decree said. "It is essential that German hard-working laboring people, standing in the forefront of the four-year plan, should be the first to receive necessary amounts of fats."

Under the decree retail dealers must supply lists of their customers to the government from which it will be decided how many persons in each household should be served fats.

The government will then apportion available butter, margarine and lard.

Buying Canadian Stocks

The London Evening Standard said that during the past few months investment trusts and insurance companies have been buying large lines of Canadian stocks. The oldest established Scottish companies, with a reputation for caution, are realizing on high-priced British industrial stocks and reinvesting in Canadian securities, the paper said.

LORD NUFFIELD

Who offered 20,000 pounds to aid the British Empire Exhibition to be held in Glasgow in 1938.

Outstanding Graduates

Two Appointments Are Made At University Of Saskatchewan

Appointment of two outstanding graduates of the University of Saskatchewan as assistant professors of that institution is announced by President W. C. Murray. Norman S. Grace, Ph.D., becomes assistant professor of physics chemistry, and David H. Russell, now studying for the Ph.D. degree at Columbia University becomes assistant professor in education. The appointments take effect next year.

Norman Singers Grace graduated in 1927 with high honors in chemistry. He received the degree of Ph.D. from McGill University and was awarded the Beit scholarship in London, England.

He has since been employed as a research chemist by the Gutta Percha Company of Toronto. He is a member of a brilliant family. Nat H. Grace is a research worker in the national research laboratories, Ottawa, and Archie J. Grace is now professor of clinical surgery at Western University, London, Ontario. Both have accomplished notable work. The family made their home in Saskatoon.

David Russell was the first student to receive the master's degree in education from the University of Saskatchewan after the formation of a college of education here. He was later principal of Melfort high school and was awarded a fellowship by Columbia University, New York. Professor Russell comes from Bristol, Quebec.

Value Of Short Speeches

Newspapers Cannot Give Space To The Hear Address

Lord Asquith, when Prime Minister of England, once said that no politician should take more than 20 minutes to make an important speech, and he himself held almost rigidly to that rule, even when introducing a big bill or debating a crucial point. Few speakers ever had such facility for condensing addresses which were marvels of lucidity and English. Sir John Simon, who has the same facility, the two and three hours man becomes a bore, and besides, no newspaper can give that amount of space to remarks for the public to read, whereas a 20 minutes address can be given verbatim—Stratford Beacon-Herald.

An Unusual Exposition

Russia Collecting Musical Instruments For Display In Moscow

Musical instruments will have an exposition of their own in Moscow, Russia, next year. About 900 devices for making harmony are being collected from all parts of the country for the exhibit. The aim is not only to trace the development of these instruments from the simplest to the most complicated, but to show how music is thriving among the peoples of the Soviet Union. Special sections of the show will be devoted to folk instruments created in the last 20 years and the manufacture of musical instruments by the various nationalities within the Soviet's far-flung dominions.

Eiffel Tower May Go

The Crystal Palace, one of the "sights" of London's Great Exhibition of 1851, was one of the longest buildings in the world, as the Eiffel Tower, erected as one of the "sights" of the Paris Exposition of 1889, was, and still is, one of the tallest structures in the world. The Eiffel Tower survives, but even its demolition is now being demanded by a section of Paris opinion.

It is said that 508 broadcasts for missing relatives of sick persons are successful in 84 per cent. of the cases.

Find Sanctuary In England

Right Of Asylum Always Extended To Refugee Celebrities

For generations the United Kingdom has been the sanctuary of kings, nobles, statesmen and revolutionaries who found it no longer healthy to remain in their native lands. A whole "Who's Who" of celebrities could be compiled of the refugees who have been admitted there to save them from being deprived of their lives and fortunes. England has always recognized "the right of asylum," and has never refused admission, even to anarchists, if they gave a pledge to refrain from plotting against a foreign state or a foreign person. They knew better than plot against anyone in Britain because Britain protected them.

A few days ago a woman and her daughter, neither able to speak English, landed at Tilbury dock, London. Asked the usual question as to what money she possessed she opened a handbag and disclosed between \$50,000 and \$75,000 in British bank notes, and added that there was another \$100,000 worth of securities in a trunk. She was Madame Villanueva Gomez, sister-in-law of the late dictator of Venezuela, Juan Vicente Gomez. Her husband had been assassinated in 1923.

She will find peace and security in England, just as Emperor Haile Selassie has done. He has sought a home near Bath. Another exiled royalty who has permanently taken up residence in England is the abdicated Emperor of Siam and his queen.—St. Thomas Times-Journal.

Canada Could Supply World

If Jackpine Can Be Used To Make Newsprint

If the time ever comes when jackpine can be successfully used in the manufacture of newsprint, then Canada will be able to supply the world, believes E. W. McBride, statistician for the Abitibi Power and Paper Company.

In an address at Toronto before the Engineering Institute of Canada, he said surgery was being used at the present time but recent efforts had been made to see what could be done with jackpine. Manufacture of pulp and paper was explained in detail in the address.

SLENDERIZING WRAP-AROUND PERFECT FOR BUSY HOURS OR LEISURE TIME

By Anne Adams

Isn't it a grand thrill to know that you can look as smart and trim when you're bustling through your morning chores, as you do on the evening you'll find anywhere! At the first ring of the alarm, you'll have it on. For this country wrap-around boasts a fifty-five adjustable nips in your waistline and keep the deep "under-wrap" in place! Straight lines make you look slim as a whistle, trim yokes, notched collar and neatly-cuffed long or short sleeves provide their share of flattery! Stitch it up in percale for mornings—and, for afternoons, in crepe.

Pattern 4234 is available in sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 takes 4 yards 56 inch fabric and one yard contrasting. Illustrated step-by-step sewing instructions included.

Send twenty cents (20c) in coin or stamps (coin preferred) for this Anne Adams pattern. Write plain size, name, address and style number, and send order to the Anne Adams Pattern Dept., Winnipeg, Newsworld Union, 175 McDermott Ave. E., Winnipeg.

REWARDED FOR BRAVERY

Bertram Owen-Jones, young Vancouver seaman, who has been awarded the Royal Humane Association's bronze medal for rescuing three school teachers from drowning near Sechart, a resort on the British Columbia coast. The three young women had overturned their canoe and one of them, Miss Barbara Beney, started to swim toward the ship upon which young Owen-Jones was employed. He saw the struggling girl, raised the alarm, then plunged overboard and supported her till a lifeboat was lowered and all three were rescued.

A New Surgical Feat

New York Physicians Waiting Result Of Unusual Operation

New York physicians began an attempt to graft an ear taken from a dead person to the head of a person born without ears but with hearing unimpaired.

The first step in the operation was to make an incision from the spot on the head where the ear is to be grafted to the region of the collarbone in such a fashion as to form a flap.

An attempt will be made to keep this flap alive until the skin begins to grow, when the ear to be used will be inserted in the flap. It is firmly kept in the incision until the skin has grown over the cartilage and both ear and flap have formed a living organism.

Then the ear will be grafted into the proper place at the side of the head and sutured to the cartilage there. It will draw sustenance through the collarbone flap until it has grown into place over the ear socket, when it is firmly attached in its proper place the flap will be removed and traces of the operation eliminated.

Identities of the doctors and the patient were not disclosed.

Had Logical Excuse

Why British Cabinet Minister's Wife Refused Party Invitation

The wife of John Burns, who has died after a marriage of 54 years, leaving her husband very lonely, took little advantage of her position as wife of a cabinet minister—what time Mr. Burns was president of the Board of Trade—although she was a member of the House of Commons. Court in the late King Edward's time. A story used to be told that she was invited by a great lady of the Government to a party, the lady excusing herself for not coming called on Mrs. Burns because it was such a long way from (say) Grosvenor Square to Battersea. Mrs. Burns declined the invitation, explaining that it was quite as long a way from Battersea to Grosvenor Square.

An Underground Lighthouse

Flash Can Be Seen Thirty Miles Out At Sea

England is said to be the only country in the world which has an underground lighthouse! This is at Brigham. It is situated on Berry Head and as this is 300 feet high there was no need to place the light house. The huge, revolving light is actually buried in solid rock 30 feet deep. The light flashes automatically twice every 15 seconds, and can be seen more than 30 miles out at sea.

First To Use Gas

First dentist in Canada to use gas as a means of decreasing pain in extraction, Dr. Jacob Neelands of Lindsay, Ontario, has celebrated his 98th birthday. Praeferring dentistry until he was 90 years of age, Dr. Neelands served patients in Lindsay for more than 68 years.

Bridge whilst was known in Constantinople (now Istanbul) and Greece about 1870—before it was introduced to western Europe.

Plenty of sleep, says an authority on the subject, is the "best route to beauty." Obviously, a lot of people have been taking detours.

SUNDAY SCHOOL LESSON

DECEMBER 20

THE SUPREME GIFT OF LOVE

Golden text: Glory to God in the highest, And on earth peace among men, whom he is well pleased, Luke 2:14.

Lesson: 1. John 4:17-19.

Devotional Reading: John 15:12-17.

Explanations And Comments

Love the Proof of Sorrow, verses 7, 8. "Beloved, write him, the beloved disciple, 'let us love one another: for love is of God; and every one that loveth is begotten of God, and knoweth God.' Love is not an attribute of God, but his very Being, and since love proceeds from God, who are his sons must prove our sonship by our love. He that loveth not, knoweth not God; for God is love: this negative counterpart of verse seven emphasizes the thought that 'Love is of God' through which one discerns the secret things of God."

The Supreme Gift of Love, verses 9, 10. The Incarnation is the manifestation of God's love. For God so loved the world, that he gave his only begotten Son, that whosoever believeth on him should not perish, but have eternal life. John 3:16.

Love the Proof of God's Spirit in Us, verses 12-16. God's presence cannot be seen, but it can be appreciated by its results: when love is seen in man, it proves the presence of God's Spirit within him. God's love is completed in us: his abiding in us is the most complete expression of his love. Therefore, since God, which he has given us, we have the consciousness of actual fellowship with us. Moffatt translates the last clause of verse 13 as "He has given us a share in his own Spirit."

The Warrant for Love, verse 19. We love, because he first loved us. The King James' Version reads, "We love him because he first loved us." The Revision gives us a still more precious truth—that we love at all due to the primary activity of a divine love upon us.

"Sometimes far out at sea the sailor sees the sky grow tremulous and troubled. The cloud seems to be unable to contain itself; its under-surface waves and stretches downward toward the ocean. It is as if it yearned and thirsted for the kindred water. A great grasping hand is reached downward and feels after the waves. And then the sailor looks beneath, and then by and by a column of water bulks itself, growing steeper and steeper, until at last it grows the height of the hand out of the cloud and an strong pillar reaches from the sea into the heavens, from the bosom of the sea to the heaven and the sea are one. So you must make man know that God loves him, and then look to see man love God."

Was Boon To Motorists

Every Driver Owes Much To Invention Of Self-starter

Charles Franklin Kettering, industrial engineer and scientist, is honored on the 25th anniversary of his invention of the automobile self-starter. The internal combustion engine and the pneumatic tire made the automobile possible as a vehicle for man. The starter placed the motor car in the hands of woman.

No one need be a patriarch to remind of the evil days when the motorist went through the agonies of cranking his engine, agonies particularly acute on winter mornings. If he started at all it was through a combination of good fortune and the peculiar development of the cranker. If he escaped with nothing more than a fractured wrist or forearm, and did not break more than one or two of the Ten Commandments as well, these preliminaries to toting the car were regarded as highly successful.

It is easy, these days, to accept improvements in methods of transportation as we find them, without giving much thought to their origin or significance. But it is worth a thought as to what the motorist would do without the self-starter. At least, he would not be doing nearly as much as he now is, and the women who now drive would mostly be sitting at home or riding in public conveyances.—Cleveland Plain Dealer.

A Well-Deserved Holiday

Nurse To Quintuplets Granted Indefinite Leave Of Absence

Nurse to Quintuplets, sweethearts—the Dionne quintuplets—since the day of their birth, Miss Yvonne Leroux is taking a holiday. Dr. A. R. D. Dafoe announced Miss Leroux had been granted leave of absence from the Dafoe Hospital staff for an indefinite period.

Miss Leroux arrived at the little Dionne home at Chatham, Ontario, on the day of the world-famous sisters were born and except for an occasional brief holiday has attended them ever since.

Reaxus: "You ain't y'elf no more. Sick or nonepin?"

Mose: "Got insomnia. Keep wakin' up every few days."

Dogs hit 5,500 postmen as the men traveled their routes in England in the last year.

Ignorant About Canada

Pupils In United States Know Little Regarding Dominion

Amusing examples of misconceptions with regard to Canada among United States high school students, as revealed in answers to a questionnaire circulated by an American professor, entertained about 200 teachers gathered at Ottawa, Robert J. C. Stead of the Department of Immigration and Colonization was the speaker.

Following were some of the examples he quoted as given in replies by high school students to the questionnaire about Canada:

"I know practically nothing about Canada, except that most of the people live in old villages and are not very rich."

"I am terribly ignorant in regard to Canada, and all I think of is fish, snow, cold and ice."

"Canada would be all right for fishing, but I don't like fish."

"Most Canadians trap for a living."

"My impression of Canada is a lot of land going to waste. There are many forests, rivers, mountains, etc., interspersed with there with an inhabitant."

"Indians make up a large part of the population."

"There isn't anything in Canada to interest Americans, but their liquor."

"This is the first time I have really thought about the Dominion of Canada. They are so close together there ought to be something in school about it."

Mr. Stead jokingly remarked that he thought one answer given might be regarded as "100 per cent. correct." It was:

"Canada is a country that has not reached the type of civilization that it should have."

"On the whole, Canadians know much more about the United States than Americans know about Canada," declared Mr. Stead, in proportion to population, Canadians travel about three times as much in the United States as Americans travel in Canada.

See Monster Filmed

Picture Will Be Part Of Scottish News Reel

The Loch Ness "monster" has wily-nilly, become a film "star." Pictures of the animal, which are said to shatter the doubts of the sceptics as being such a creature of Great Britain as a special feature in the number of a Scottish news-reel.

The film is said to show an animal more than 30 feet long travelling through the water at a speed of about 30 knots. The photographer, Malcolm Irvine, of Scottish Film Productions, caught his first glimpse of the "monster" in December 1933. Since then he has seen it several times, but not until a few weeks ago was he successful in obtaining a film record of it.

Experts who have had a private view of the film agree that it shows a picture of an animal hitherto unknown to zoologists, but the sceptic will doubtless still have his say until the animal is photographed in conditions favorable to size comparisons with known objects.—Edinburgh Scotsman.

Taking No Chances

Reservations Being Made For-Malden Voyage Of New Liner

Fifty reservations of accommodation have already been made for the maiden voyage of liner No. 652—sister ship of the Queen Mary—although she is not due to sail for four years. Those who have booked passages include a number who failed to obtain a berth for the Queen Mary's first Atlantic crossing. Cunard White Star Company have opened a waiting list, as they did in the case of the Queen Mary. "First come, first served" is the principle.

Bill Covered Everything

Neal O'Hara, in the New York Post, said when the bill of a Chicago lay firm, which helped untangle the Innu financial mess, was recently broken down and itemized, it was found the firm charged \$100 a fee for the hours spent reading about the case in the newspapers, for discussing matters with reporters and even talking with newspaper men over the phone.

"Good heavens, M'Pherson, you've holed in one!"

"Aye; it saves wear and tear on the hall."

Mochebi Ntngale, a Zulu, 110 years old, has just married again at Harmsmith, South Africa.

Under favorable conditions, an airplane can fly from New York to London in less than 10,000 to 15,000 feet altitude.

Crossfield Chatter

Mr. and Mrs. H. Ballam were Calgary visitors during the week.

Curling commenced Wednesday night.

Wednesday December 23rd, will be a full shopping day in Crossfield, owing to Christmas Day falling in the same week.

Miss Wilda Laut is spending a few days at her home in town.

Mrs. G. Murdoch, Miss Margaret Murdoch and Miss E. Seville, were business visitors to Calgary Saturday.

Mr. Hin Fong, of Lacombe, partner of George Lim, was a business visitor in town for a few days.

Next week being Christmas week, will Advertisers please have change of copy in our hands by Monday 6:00 p.m. Subscribers in arrears arrange, before this date, your sub., so as the Ed. and Staff can get a little Christmas Cheer. News items by this date for this issue will also be appreciated.

Check over the Christmas concerts and Coming Events, lots of entertainment for young and old.

Mrs. Chas. Melmond and three young children, Ruby, Raymond and Jack, leave shortly for an extended holiday with Mrs. Melmond's parents at Victoria. Miss Ruby will enter school at Victoria, and not return to Crossfield.

Frank Laut purchased a new Fordor 1937 Ford this week. (The Ed. likes new Fords, Frank)

Relief recipients are advised that in all cases where they own automobiles, they must turn in immediately, to the Secretary of the Municipality, their license plates.

We call the attention of members of the Crossfield Mutual Telephone to the Company's advertisement, and suggest, that if attention has not been given to same, to do it now. The Government is pleased with the way the affairs of your company is being carried out. Keep it ever thus.

Work on the skating rink is going apace and all that is needed is a tightening-up of the weather. Ticket are now on sale at T. Tredaway's office. Procure now and boost for your rink. Rink will open Friday, December 18.

During the holidays you will be having visitors and will be visiting. Let the Chronicle have this information, your friends appreciate reading this.

Teachers and School Boards, please let us have a write-up on your School's Christmas activities. Never mind whether you saw a Chronicle man there or not. Some times at this season of the year the reporter is so much taken-up with the activities that he might forget just what transpired.

CARD OF THANKS

Miss Edith McKenzie desires to thank, at this time, the many friends who have showered so much happiness on her during the past two weeks.
